William E. Raymond,
Pcubed US Solutions Manager,
Program Planning Professionals, Inc

Bill Raymond has served the Project Management industry for over twelve years. During that time, he has been able to combine his business experiences, with a strong technical background, to work with critical sponsorship teams to manage scope and costs, while diving down to the technical aspects of a project, in a manner that fosters understanding and comprehension to all members of the project team. His project experience ranges from managing commercial software releases to implementing ERP systems and developing business processes to build corporate governance policies and standards.

Throughout his career, Mr. Raymond has excelled in the utilization of Microsoft Project to organize, prioritize and manage projects. He has worked with Microsoft Project for nearly seven years and has formally provided beta testing and community support in the product for the last three years.

Bill is a Certified Project Manager and has been a Microsoft Project MVP for the last three years.
